Water bottle

Comfortable clothing

All materials included

Max. 8 spots
Register early!

Take learning to new heights!

FLIGHT LAB introduces students to the exciting world of drones through interactive missions, flight challenges, teamwork, and age-appropriate programming. Students will learn how drones work, develop navigation and problem-solving skills, and use technology to complete increasingly challenging missions.

Over six weeks, students will progress from basic flight and navigation to obstacle courses, search-and-rescue missions, delivery challenges, and a final flight challenge. With limited flight stations, students will rotate between piloting, planning, programming, testing, and teamwork - keeping everyone actively engaged.

By the end of the program, students will have gained hands-on experience with drone technology, programming, problem-solving, computational thinking, and teamwork while completing fun challenges.

**LEARN TO PROGRAM AND
PILOT YOUR OWN DRONE!**
